Forecast for Saturday 24 Jul 2021

Weather: Low cloud will drift back towards the Park from the North Sea overnight, becoming widespread by the morning with a chance of hill fog over the highest peaks. Any low cloud will however burn back towards the coast by daytime, allowing plenty of sunshine though often hazy in the afternoon. Low cloud then returning from th east during the evening, though perhaps patchier and confined into the east of the Park.

Chance of cloud free mountain/hill tops above 600m: 70% in the west, but 10% in the east initially, before becoming greater than 95% throughout by midday. Reducing to 80% in the east from late evening.

Visibility: Mediocre in cloud between 400-600 m but improving through the morning, with cloud base slowly rising and breaking. Slightly hazy beneath the cloud base, but generally good visibilities. Distant hills becoming more easily visible during the afternoon. Patches of cloud likely lowering to around 600-700m from late evening.
